Release Notes Awingu 5.3.2

Introduction

Awingu 5.3.2 is a minor release containing important bug fixes and security updates.

If you are upgrading from **5.2.4** or **5.2.5**, please refer to the Awingu 5.3.1 release notes for an overview of the new features and important changes of Awingu 5.3.

Fixed bugs

Description
Unable to paste copied data from a local application to an application in Awingu in some scenarios.
Some applications in Awingu show the error "Data Transfer to clipboard failed" even though no copy action has happened.
Unable to paste to an application in Awingu when the browser is focused using COMMAND+TAB or by clicking on the browser tab when using MacOS.
Selecting a window or application in the navigation bar does not always focus the expected window.
The feature to trust the browser is not working when still logged in into another session.
Login without admin permissions not working when already logged in.

Upgrade Instructions

You can upgrade to Awingu 5.3.2 from Awingu **5.2.4, 5.2.5** and **5.3.1**

1. Sign-in to Awingu with an administrator account (of an administrative Awingu domain) and check that all services in the *Dashboard* are green.
2. Make sure the host (hypervisor) is not in a stressed state (CPU and disk IO) and that the memory is not ballooning.
3. It is **highly recommended** to shut down the appliance(s) cleanly now and take a **snapshot/backup**. It is also recommended to take a backup of the database if you are using an external database.
4. Start the appliances(s) up, sign-in to Awingu with an administrator account (of an administrative Awingu domain) and wait until all services in the Dashboard are green again.
5. Make sure all Awingu appliances in your environment have internet connectivity (access to https://repo-pub.awingu.com).
6. Open the *System Settings*.
7. At the *General Information* page, in the section *Upgrade Version*, select 5.3.2 and click Upgrade.
   ⚠️ The **upgrade can take up to 60 minutes per appliance**, depending of the disk and network speed.
   ⚠️ Don't refresh the *System Settings* page.
   ⚠️ Do not reboot your appliance(s) during the upgrade.
8. When the upgrade has completed: Close *System Settings* and Logout. Refresh your browser before you re-login.
9. It is **highly recommended** to **reboot** the appliances(s) after a successful upgrade.
